

# How to realize more turnover in foreign markets with DHI-subsidy

The Dutch government provides financial support to Dutch SME's to develop their business activities in foreign markets by means of the DHI-programme. DHI is open for all countries except for the Netherlands and sanctioned countries. The available budget for the second tender of 2017 is € 2 million for DGGF countries\* and € 3.75 million for other countries\*\*. The deadline for filing a subsidy application is 19 September 2017 and a [quickscan](#) is required. Please read below which activities are eligible.

## 1. Demonstration project

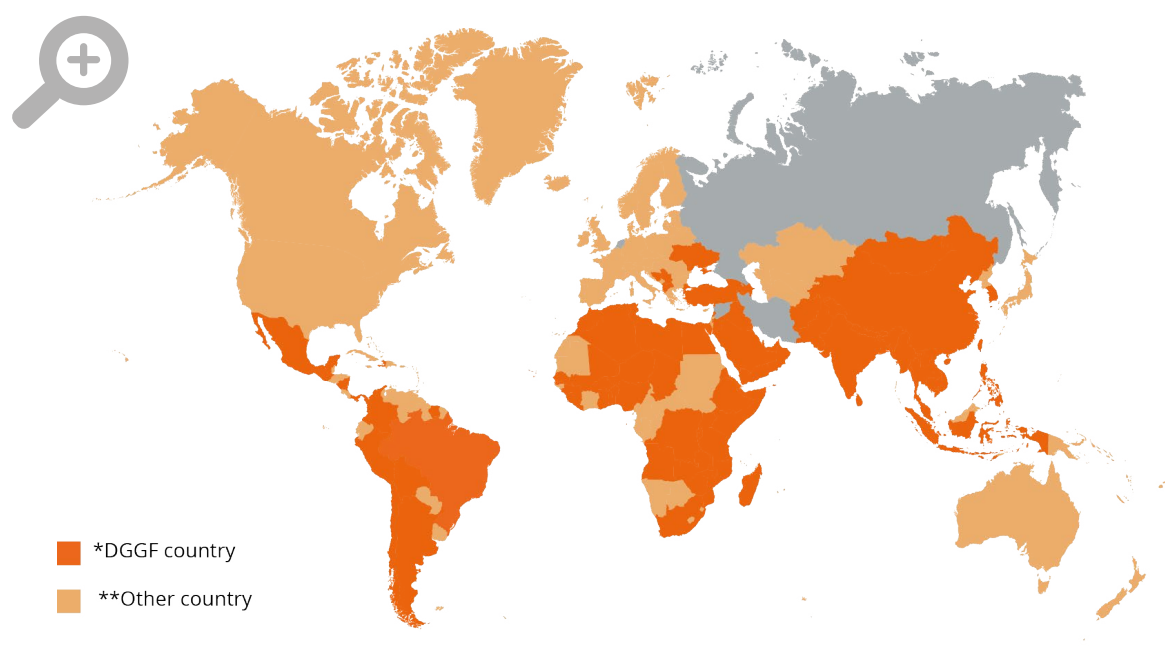

- Demonstrate Dutch technology to potential customers with the aim to convince them about your product.
- The subsidy amounts to 50% of the eligible costs up to max. € 200,000.

## 2. Feasibility study

- Research into the technical and commercial feasibility of a foreign investment in your product with the aim to convince a potential client to purchase your product.
- The subsidy amounts to 50% of the eligible costs up to max. € 100,000.

## 3. Pre-investment study

- Assess the technical and commercial feasibility of your investment project.
- The subsidy amounts to 50% of the eligible costs up to max. € 100,000.
