Sustainable Development Goals Partnership Facility

With the SDG Partnership facility (SDGP), the Netherlands Ministry of Foreign Affairs aims to contribute to the achievement of various **sustainable development goals** in developing countries.

Working in food security and private sector development in emerging markets and developing countries is complex in nature since there are often different interests involved. In such cases, problems cannot be financed by just one party. That is why the SDG Partnership facility encourages the establishment of PPPs for joint initiatives of private sector development for food security.

The first opening (call) focuses on improving food security and stimulating private sector development in developing countries through public-private partnerships (PPPs). Companies, public institutions, NGOs and knowledge institutions that want to cooperate in a PPP in order to contribute to sustainable development goals (SDGs) in developing countries can receive grant funding from the SDGP facility from 2019 onwards.

Budget

- The available budget for the first opening is € 35 million.
- Per project, a co-financing subsidy of at least € 500,000 and at most € 3 million can be granted.

Themes

- Efficient value chains
- Nutrition value
- Circular economy – agri-sector
- Better work and income for youth and women

Participation requirements

Initiatives of PPPs may be eligible for support. SDGP projects must contribute to one or more of the following goals:

- Reducing malnutrition;
- Promoting growth in the agricultural and fisheries sector;
- Creating sustainable and ecologically sound food chains;
- Creating better labour conditions and efficient working procedures;
- Causing an increase in private investments.
- In the first call, PPPs can submit project proposals with one of the following themes:
- Efficient value chains
- Nutrition value
- Circular economy – agri-sector
- Better work and income for youth and women

The partnership must consist of a maximum of 6 partners and include 1 Dutch organization, 1 local organisation, 1 NGO or knowledge institution, 1 company and 1 government organization. A local government organization is preferred.

SGDP country list

SDGP is open to activities in the countries included in the SDGP country list.

Afghanistan, Algeria, Angola, Armenia, Bangladesh, Benin*, Bhutan, Bolivia, Burkina Faso, Burundi*, Cambodia, Cape Verde, Chad, Colombia, Côte d'Ivoire, Democratic Republic of Congo, Djibouti, Egypt*, Ethiopia*, Gambia, Georgia, Ghana*, Guatemala, Guinea, Haiti, India, Indonesia, Iraq*, Jordan*, Kenya*, Kosovo, Laos, Lebanon*, Liberia, Libya, Madagascar, Malawi, Mali*, Morocco, Moldavia, Mongolia, Mozambique*, Myanmar, Nepal, Nicaragua, Niger, Nigeria*, Pakistan, Palestinian Territories*, Peru, Philippines, Rwanda*, Sierra Leone, Sao Tome and Principe, Senegal*, Somalia, South Africa, South Sudan*, Sri Lanka, Sudan*, Suriname, Tanzania, Togo, Tunisia*, Uganda*, Vietnam, Zambia.*

*IGG-DDE-countries are getting bonuspoints.

Track record

Larive International has extensive experience with the FDOV facility, the facility for PPPs for food security and private sector development prior to SDGP. Larive has successfully initiated FDOV projects during previous tenders (2012, 2014). This includes the development of the project concept, establishing the partnership and submission of the full proposal and subsidy application.

At current, Larive International coordinates FDOV projects in East Africa ([FoodTechAfrica](#) – aquaculture) and India ([FoodTechIndia](#) – horticulture).

FoodTechAfrica

FoodTechAfrica is improving food security through private sector development in East Africa.

- Region: East Africa (Kenya, Uganda, Rwanda and Tanzania)
- Focus: aquaculture sector
(The entire value chain including feed, production, processing)
- Public-private partnership, involving 13 project partners

Companies:

Almex, Dinnissen, Fishion, Best Fresh Fish, Holland Aqua, KMFRI, Lattice Consulting, Nutreco (Skretting), Ottevanger Milling Engineers, Unga Group, Vigon Water Solutions, Wageningen UR, the Ministry of Foreign Affairs of the Netherlands.

Website: www.foodtechafrica.com

FoodTechAfrica Activities:

Investments in production:

- Fish feed
- Fish production
- Fish processing

Technical assistance

- Market research, feasibility studies, business plans
- Training/ knowledge transfer
- Project management
- Meetings (East Africa, Netherlands)

Other activities:

- Marketing & Communications
- Engineering & architecture
- Legal advise
- Certifications

Integrated fish value chain realized:

Additional and improved feed, production, processing, cooling, logistics, retail, wholesale and food service.

Outcome

- A. Increased sustainable food production
- B. Better access to healthy food
- C. Improved market efficiency
- D. Improved business environment

Impact

- A. Poverty alleviation
- B. Sustainable economic growth
- C. Increased self-reliance

FoodTechIndia

Reduce food wastage in India

- Region: India
- Focus: Reduce food waste
- Public-private partnership, involving 4 project partners

Activities:

1. The establishment of an improved supply and cold chain from farm to retailer.
2. Training of 10 000 farmers in using the best farming practices in closed cultivation and optimal post harvest practices.
3. Providing farmers with direct linkage to leading retail groups

Companies:

Rijk Zwaan, TNO, Broekman Logistics, Future Consumer Limited (Leading Indian retail group), Larive International, Ministry of Foreign Affairs of the Netherlands.

Support and experience

Larive international has (partner) offices in most of the SDGP applicable countries, a strong track record in the agro-food sector, extensive experience with initiating and coordinating projects with consortia of public and private partners and an excellent relationship with the Netherlands Ministry of Foreign Affairs. Larive adds value by being an experienced project developer in the application phase. Moreover, we act as a neutral project coordinator in the partnership, aligning individual interests while ensuring the successful realization of project results.

Submission of concept notes is open until **1 October 2018** and subsidy application should be submitted between 16th November and 17th December 2018, 15:00 (CET). Larive would be happy to support you through the different SDGP project phases.
